ABOUT OUR BRAND

With the mission of spreading the quintessential value of Vietnamese Rice to the world, we bring dedication and premium quality in each of our products.

Who we are?

Founded in 1956, PetroVietnam Machinery - Technology JSC (PVMachino) is one of the leading multi-industry enterprises in Vietnam. With 65+ years of history, PVMachino has proven its competency through many different fields of business, highlights of which are: import and export; equipment and machinery production; investment,...

In recent years, PVMachino has been focusing on food exporting sectors, in which Fragrant Rice is our strategic product. Our commitment to product quality ensure us a bond of faith and trust with our partners in over 10 countries and territories, including France, Australia, Singapore, Japan, China, Pakistan, UAE, Philippines, and counting...

Why we choose rice?

“For thousands of years, rice has become a symbol associated with daily lives of Vietnamese people, and has nurtured future generations of the country.

Rice has long been the culture, the hope of every Vietnamese. Rice is also the identity, the indispensable food in every Vietnamese family's meal.”

Continuing the traditional quintessence of the country, PVM wants to bring the best values of Vietnamese Rice to all over the world, and at the same time to nurture and create future generations of Vietnamese farmers. *“Every grain of rice is made with the strength and faith of the farmers.”*

How we bring value?

Dedication, Innovation and Sustainability is our working motto.

We believe in the long-term value that can be brought to customers and farmers by creating the highest quality organic Rice.

Based on that, what makes PVM stand out among others can be seen as: Large-scale milling factory with modern technology, Research institute on Rice Seeds and our own Sustainability preserve team.

ABOUT OUR CAPABILITY

We focus on investing in infrastructure as well as production processes. We bring dedication and premium quality in each of its products.

Closed Production System

PVM has always taken pride in its closed production system, ensuring the best quality and focusing on each grain manufactured. Our process started from the careful selection of rice seeds to the planning of cultivated areas; then comes the process of planting, caring, ensuring the nutrition and productivity.

- EC Regulation No. 178/2002, January 28, 2002

Quality control Protocol

PVM follows a very stringent and foolproof quality control process. The grains are examined at every stage till the shipment is loaded by both our in-house Quality Control Team and Independent Inspection Agencies.

Large-scale production & Diversification of rice

06 FACTORIES

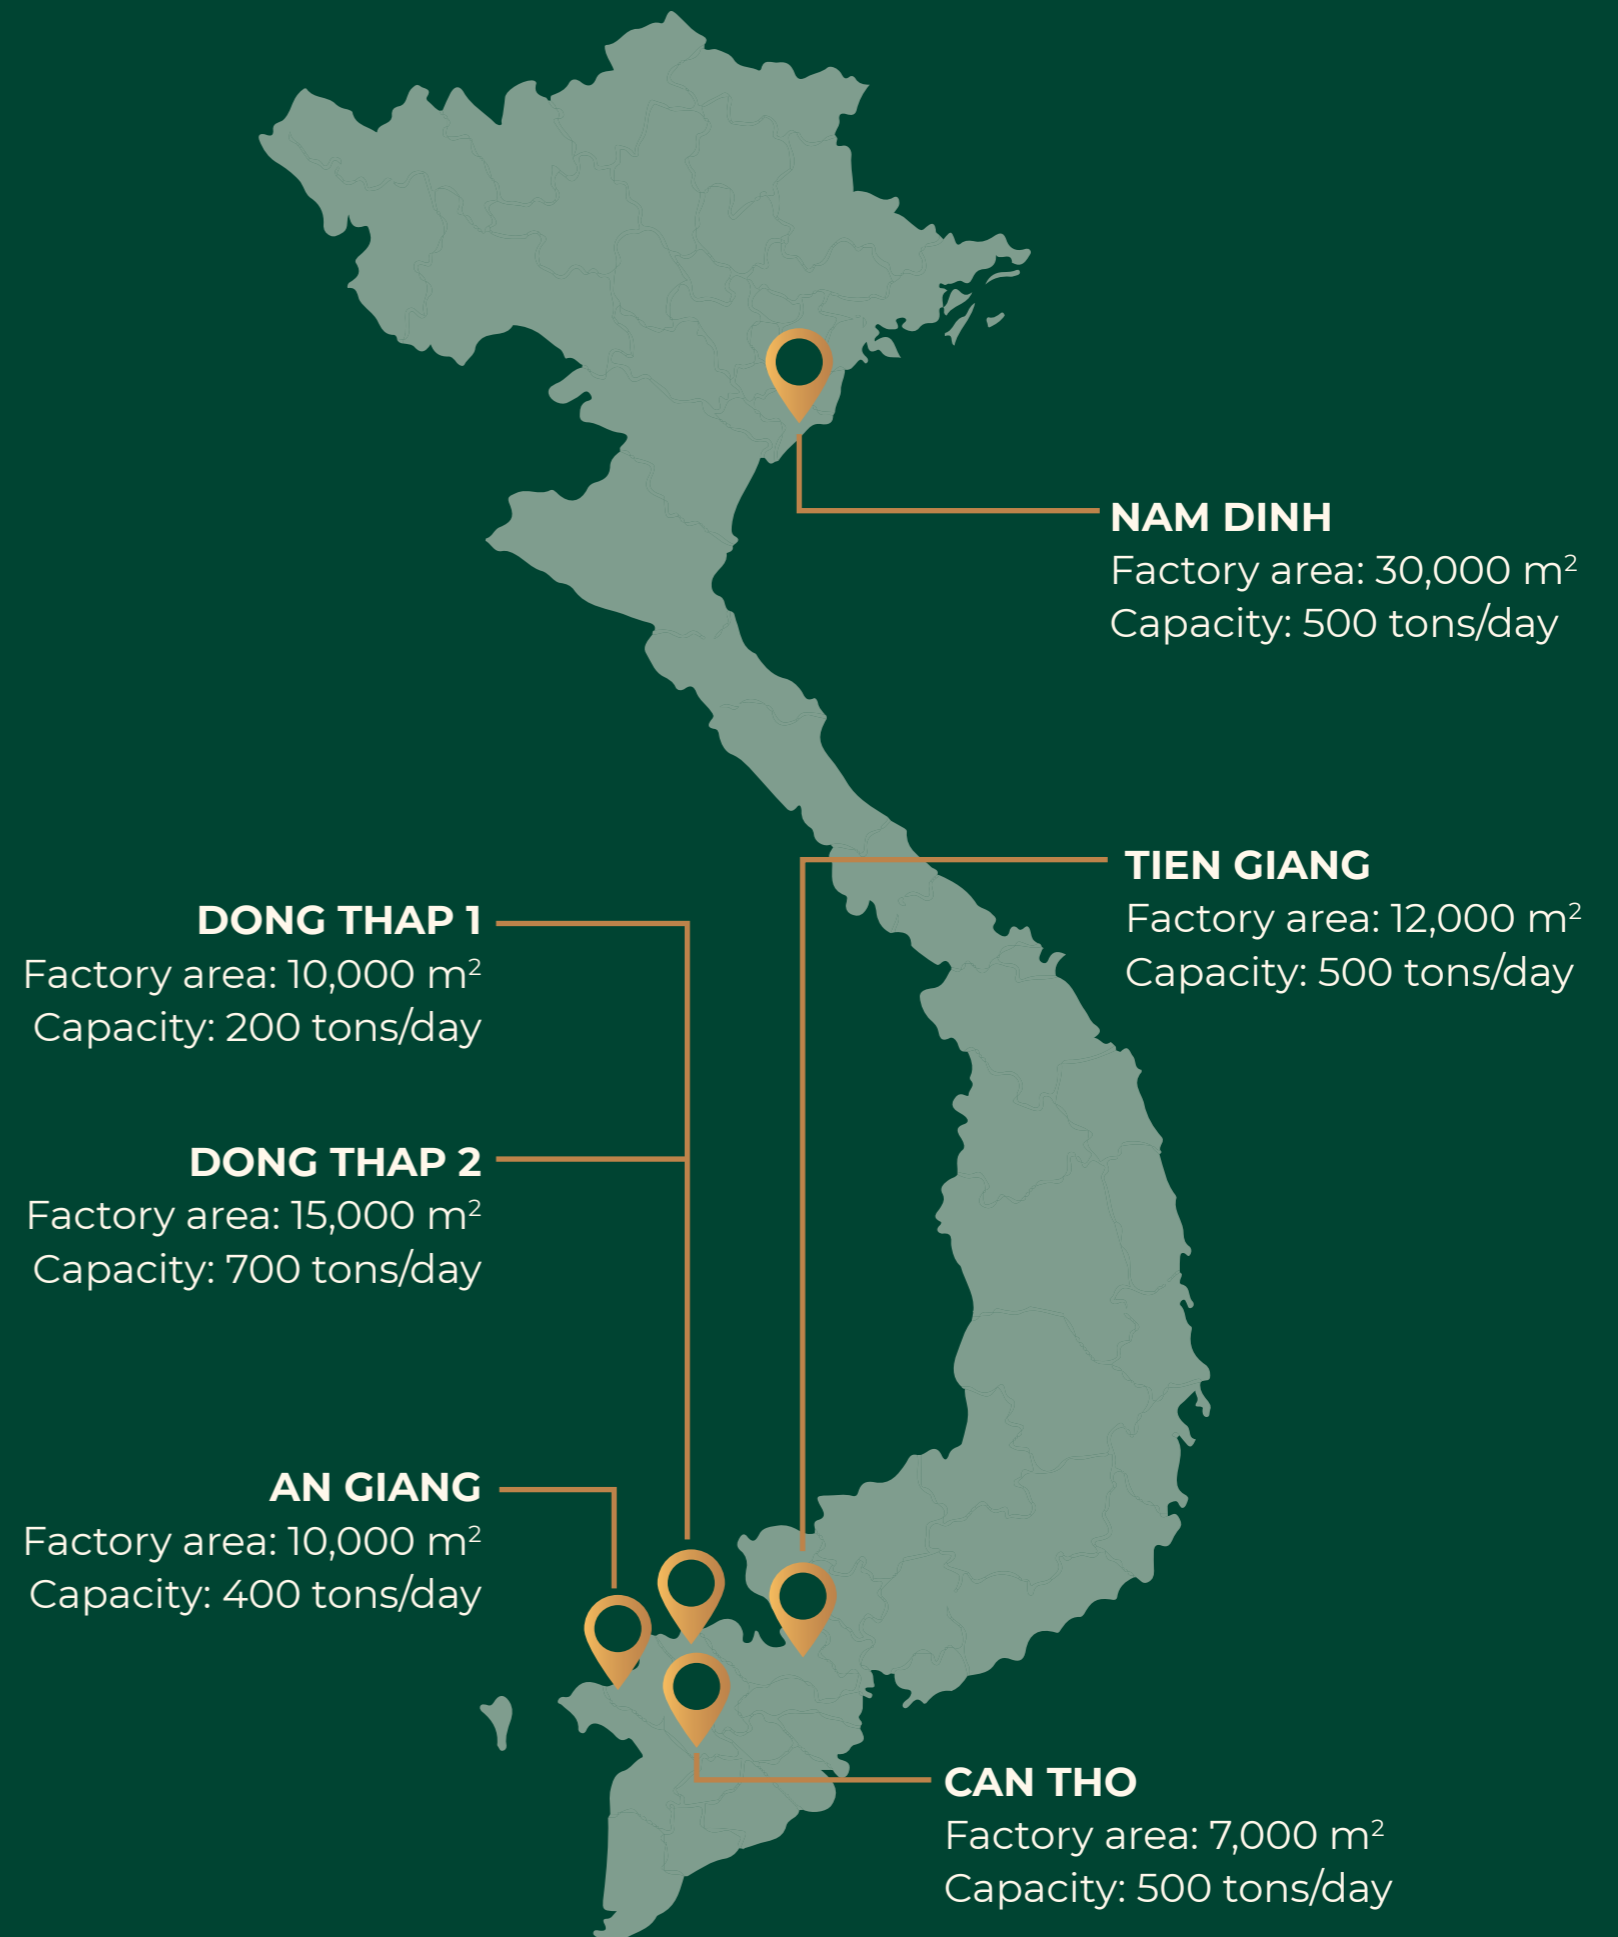

The system of more than 200 silos can contain up to 700,000 tons of rice. The capacity of milling and processing 4,500 tons/day (dry rice) brings the total capacity of finished rice to 2800 tons/day.

15 JOINT VENTURES

To create a complete supply chain for the rice production process, PVM enters into joint ventures with many companies in related industries including Packaging Factories and Logistics companies.

COOPERATION SYSTEM OF RICE FARMERS

The company has strategic alliances with a system of rice farmers across the country, enabling PVM not only to purchase large quantities of rice for large orders, but also to research rice varieties in different cultivation areas.

DONG THAP

Factory area: 10,000 m²
Capacity: 200 tons/day

CAN THO

Factory area: 7,000 m²
Capacity: 500 tons/day

Our factories are mainly located throughout Mekong Delta, which has the largest rice production in Vietnam. The location of our factories helps significantly minimize time and cost of transporting fresh rice from the field to the factory for farmers; ensure ideal conditions for fresh rice to be dried and stored immediately after harvest for less than 10 hours with perfect quality; and retain the aroma and taste of rice varieties.

TIEN GIANG

Factory area: 12,000 m²
Capacity: 500 tons/day

NAM DINH

Factory area: 30,000 m²
Capacity: 500 tons/day

The factory operates technological solutions imported from Europe such as the system of receiving, cleaning, drying and storing rice of SKIOLD Group (Denmark); rice milling system from BUHLER (Switzerland); The accompanying equipment is imported and synchronized with EU standards from Italy, Germany, Poland...

Expert in Rice Research & RDevelopment

01

RESEARCH INSTITUTE ON RICE SEEDS

PVM has always been dedicated to the study and improvement of traditional rice varieties in Vietnam. We combine the latest advancements and breakthroughs in paddy gene technology to create superior rice varieties. Our ultimate goal is to consistently produce the best quality rice possible.

PVM had its own research institute on Rice seeds, consisting of top rice experts and collaborating with the largest and oldest research agents with 100+ collective years of professional rice seed research and development experience.

02

IN-HOUSE MARKET ANALYSIS TEAM

PVM developed its own in-house market analysis team, whose main task is to continuously collect market information from our network of merchants across the country, and analyze real-time data to come up with the most appropriate development and production plan.

ABOUT OUR PRODUCTS

Introducing Vietnamese Prestige Fragrant
Prestige Series: ST25, Luna, Jasmine, Koji

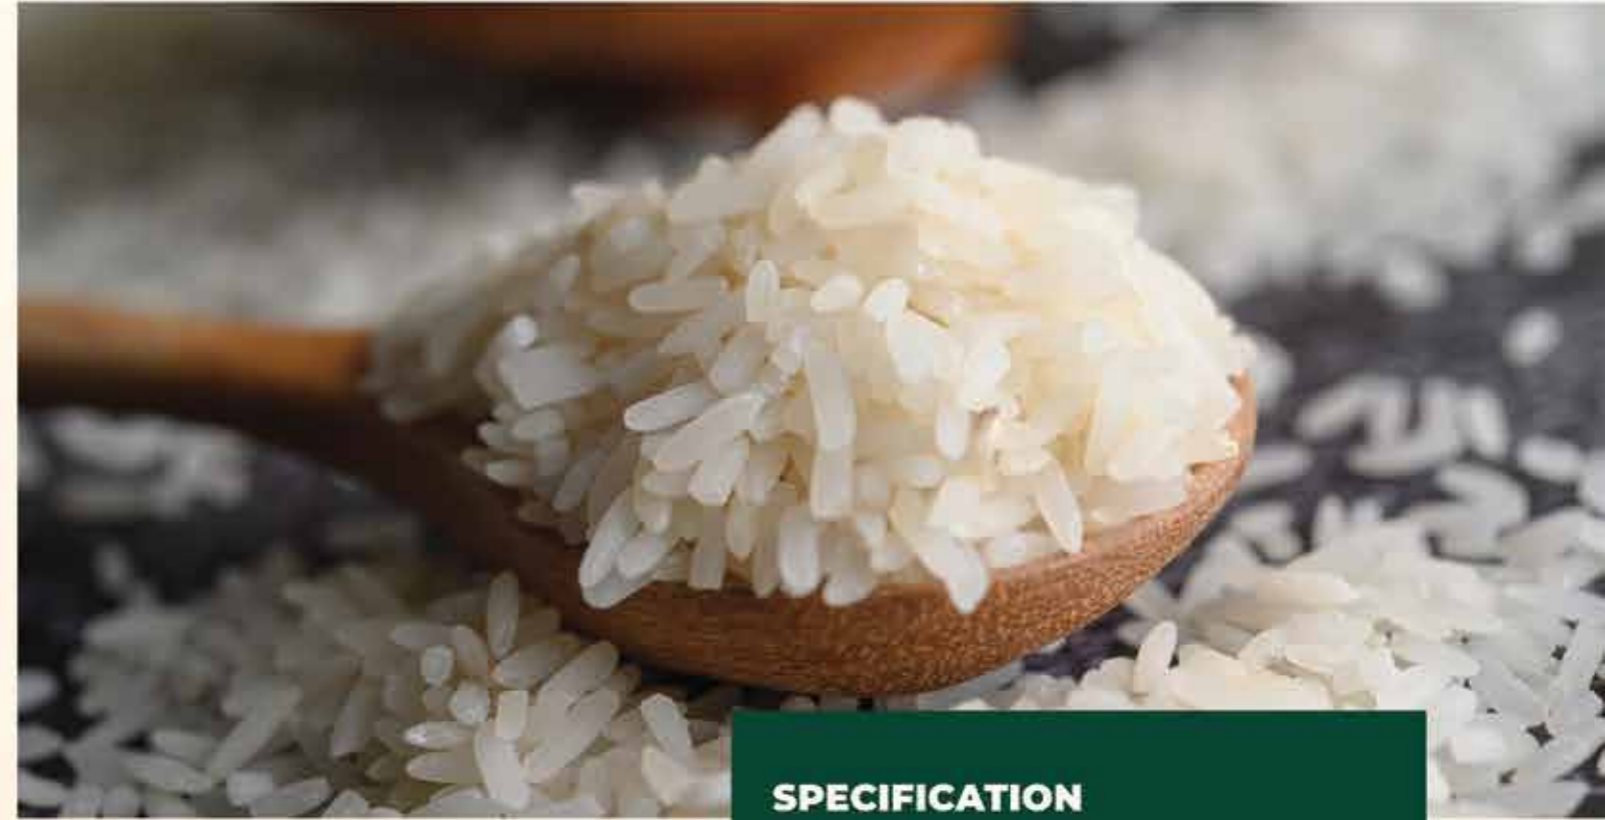

ST25

FRAGRANT RICE

The quintessence of Vietnam
Rice and the World's best
Fragrant Rice.

ST25 grain is long and slender, white color, with its light fragrance of pandan leaf. ST25 rice is produced from the specialty variety of rice ST of Soc Trang province, the grain is also clear, and silver-free. Cooked rice has a very soft, sweet, and pineapple flavor.

SPECIFICATION

Broken (max)	5.0%
Moisture (max)	14.5%
Foreign matter (max)	0.1%
Damaged kernels (max)	0.5%
Average length	7.5mm

ST25 Rice - one of the world's most famous rice - also known as Soc Trang Fragrant Rice, is the result of 20+ years of research and development from all of the best characteristics fragrant rice . The ST25 variety is the latest generation of the famous fragrant rice line with many qualities that are classified as "prestige". From seed selection to planting, we all follow the strict principles of the Organic rice production process to produce high quality rice that is clean and safe for health.

AWARDS

The quality of ST25 rice has been recognized internationally when it won the title of "World's Best Rice 2019" in Manila and won the second prize at the "World's Best Rice 2020" contest held in the US, which is a statement on the premium quality of Vietnamese Fragrant Rice.

JASMINE FRAGRANT RICE

Jasmine rice is a long-grain variety of fragrant rice. Its fragrance, reminiscent of pandan and popcorn, results from the rice plant's natural production of aroma compounds. To harvest jasmine rice, the long stalks are cut and threshed. The grains cling and are somewhat sticky when cooked.

The rice is moist and soft in texture, with a slightly sweet flavor.

The gourmet choice for rice

SPECIFICATION

Broken (max)	5.0%
Moisture (max)	14.5%
Foreign matter (max)	0.1%
Damaged kernels (max)	0.5%
Average length	6.9mm

Vietnam Jasmine Rice is a kind of high-quality rice which is widely cultivated in The Mekong Delta. Named after the sweet-smelling jasmine flower of Southeast Asia (in Vietnamese: Hoa Lai), jasmine rice has a unique nutty aroma similar to the smell of jasmine.

Jasmine rice variety has appeared in Vietnam for a long time and has been giving consumers many effective features. Recently, The Vietnam Food Association (VFA) has decided that Jasmine will be the national rice brand for Vietnam.

AWARDS

Jasmine rice has participated in many competitions around the world and is widely recognized. One of the biggest awards for Jasmine rice is probably reflected in the number of Jasmine rice import markets. The quality of Vietnamese Jasmine rice has continuously improved, hitting the tastes of European consumers.

LUNA

FRAGRANT RICE

(Generic name: *Huong Com*)

The name “Luna” was inspired by the celebration of the traditional mid-autumn festival in Vietnam. Which also happens to be the rice harvesting season. As if Luna is: bright, beautiful, and magical like the full moon.

Luna grain is slim, long, clear, and glossy; rice is soft and quite flexible after cooking, it is tasty and naturally sweet with the aroma of young nuggets. Luna has superior quality and taste compared to other rice and its nutrition is very high.

SPECIFICATION

Broken (max)	5.0%
Moisture (max)	14.5%
Foreign matter (max)	0.1%
Damaged kernels (max)	0.5%
Average length	6.7mm

Every grain of Luna is considered a “pearl” in the eyes of the farmers who make it.

Why? The answer lies within the exceptional quality and flavor that comes from every grain of Luna, alongside the complexity and effort it takes to achieve them.

Luna is at the top of the world's best rice cultivated according to International Food Standards. Luna is synthesized with many imported aromatic genes combined with local specialty genes, carefully selected, and repeatedly evaluated to create the best possible fragrant rice.

AWARDS

Luna has won many times its famous predecessor ST25 (the winner of World Best Rice 2019 and runner-up of World Best Rice 2020) at domestic rice competitions.

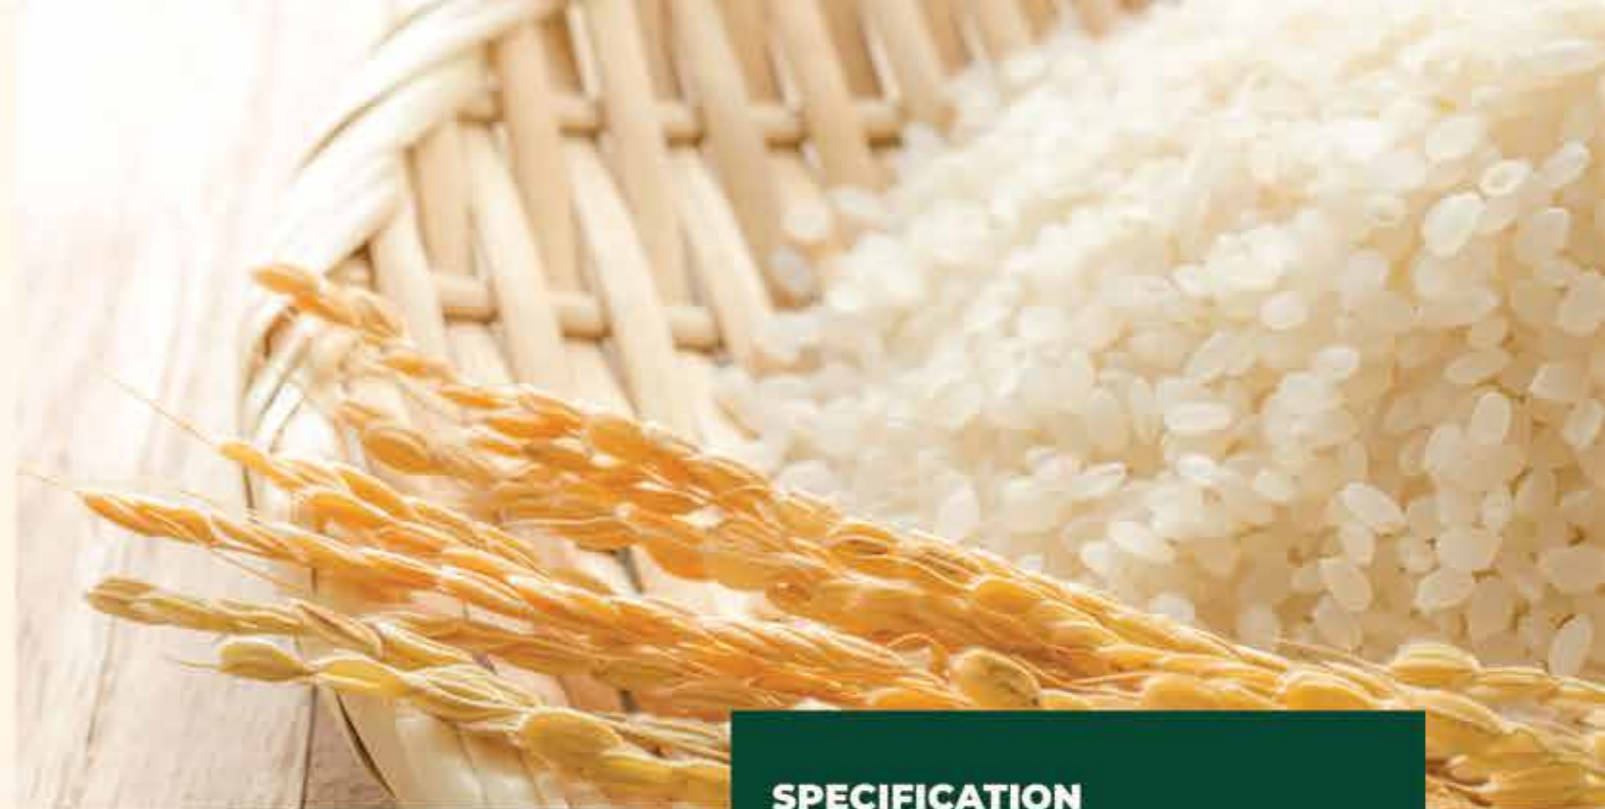

KOJI

FRAGRANT JAPONICA RICE

In Japanese, 固持 | こじ | Koji means resilience, tenacity and obstinacy. In the same way, the Japonica Koji variety is a rice variety with very strong vitality and an exceptional quality.

Koji Japonica rice grain is round, plump, hard, equal, and less broken. When cooked, the grains are white, shiny under the sun, soft, flexible, and very nutritious.

Japonica Koji is developed from Japonica - Japanese Signature High Quality Rice. Japonica Koji is produced entirely by the high quality standards of Japan. Japonica Koji not only inherits all the best qualities of Japonica, but also shows the superiority of rice aroma and nutritional content. The nutritional composition of Japonica Koji has a high protein ratio, rich in vitamins and minerals, and many trace elements beneficial to health. No residues of pesticides.

SPECIFICATION

Broken (max)	5.0%
Moisture (max)	14.5%
Foreign matter (max)	0.1%
Damaged kernels (max)	0.5%
Average length	5.1mm

AWARDS

Japonica Koji rice has won the best sushi rice contests in Japan - organized and voted by Japanese people
